With the support and guidance of my mentors, I was able to climb my way to General Manager 10 years later.

Gaby Corona

FORWARD

**Director
Service Culture & Performance
Hyatt Hotels Corporation**

Gabriela Corona, known affectionately as Gaby. From the vibrant region of Jalisco, Mexico, before migrating with my family to the USA in the early 90s. The first few years were very challenging, adapting to a new environment was anything but smooth sailing, compounded by the struggle to reconcile my Mexican heritage with the cultural nuances of my new surroundings. I faced bullying, a consequence of not fitting neatly into preconceived stereotypes. The cultural differences begin to die down as I found my way in this country, however the unknown of how university life in the USA worked soon became apparent. I found myself grappling with student debt and with my parents unable to assist I had to make the choice to withdraw from school and not complete my degree. After a few random jobs I joined a hotel as an admin and immediately fell in love with hospitality.

Embracing the unknown, I transitioned into Rooms and began to realize how much I loved the different aspects of hospitality, I didn't need to be an expert in one thing, I thrived feeling "uncomfortable" to learn new aspects of hospitality. I continued to take roles that were out of my element, but it all came to a halt when the pandemic struck.

Amidst the uncertainty, following a period of introspection, I gravitated back to Hyatt as its purpose and culture continued to inspire me as it aligned so closely to who I am.

Today, I stand at the forefront of an unparalleled transformation, working alongside hotel leaders and regional teams to embrace a growth mindset and revolutionize our approach to work. Witnessing the tangible impact of Agile on our operations reaffirms my belief in our collective purpose. With each milestone achieved, I am reminded that the journey is as enriching as the destination, and I am grateful for the opportunity to be part of this extraordinary evolution
